Forecast for Wednesday 26 Jan 2022

Weather: Patchy cloud and occasional hill fog overnight and into Wednesday morning. Persistent rain will develop across the west through the afternoon, but rain patchy in nature in the east. Gale or severe gales on the summits, becoming more widespread through the afternoon with severe gales or storm force winds. Rain clearing south through the evening but staying windy with blustery showers for the western hills.

Chance of cloud free mountain/hill tops above 800m: 40% through the morning, with best chances in the south and east. Lowering 10% or less through the afternoon.

Visibility: Poor in hill fog with cloud down to 700 m through the morning and occasionally 400 m in rain through the afternoon and evening. Otherwise good lowering moderate in rain through the afternoon and evening.

Met Office Aberdeen Meteorologist's View

Expect a notable wind chill through the afternoon with a combined effect of persistent rain and gale to storm force winds. Maximum gusts speeds may reach 90 mph on the Cairngorm Plateau .

Forecast for Thursday 27 Jan 2022

Weather: Blustery showers with spells of brighter conditions. These showers will fall as snow above 400 m and may be heavy at times through the morning, before easing later in the afternoon as the strong or gale force northwesterly wind becomes strong or gale force.

Maximum wind: West to northwest 45-50 mph gusting 65 mph overnight and into Thursday morning, easing a little later.

Chance of cloud free mountain/hill tops above 800m: 60%

Visibility: Very good away from intermittent hill fog in snow showers, where cloud will lower to 500 m with poor visibility.

Temperature: **Glens:** Plus 2 rising to plus 4 around midday.
At 800m: Minus 2
Freezing level: 500-700 m.
